REGU®-AGE

REGU®-AGE dramatically reduces dark circles and unsightly puffiness around the eyes. It is an active complex consisting of specially purified soy and rice peptides and yeast protein produced biotechnologically.

Properties:

- Improves blood hemodynamics and microcirculation
- Reduces the proteolytic breakdown of the collagen and elastin matrix
- Reduces the presence of free radicals

Untreated skin

Treated skin

Before treatment

After 8 weeks

Function:

- Reduces dark circles and puffiness around the eyes
- Strengthens the connective tissue
- Reduces inflammation and prevents UV damage

Cosmetic application:

- Facial care products
- Anti-ageing eye care creams and gels

REGU®-AGE is principally intended for mature skin that is beginning to exhibit the initial signs of ageing.

Formulation:

REGU®-AGE is a yellowish aqueous solution and can easily be incorporated into the aqueous phase of a formulation.

REGU®-AGE should be processed below 40°C and is stable in the pH range of 5.5 to 8.0.

Suggested concentration:

2–5% **REGU®-AGE**

Efficacy tests:

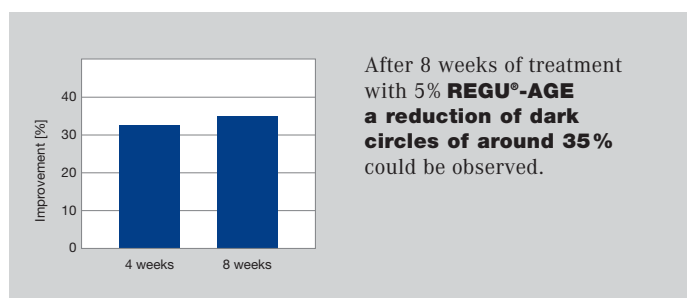

In-vitro test:

In vitro tests (aPTT-activated Partial Thromboplastin Time and TT-Thrombin Time) have shown that **REGU®-AGE** improves the microcirculation.

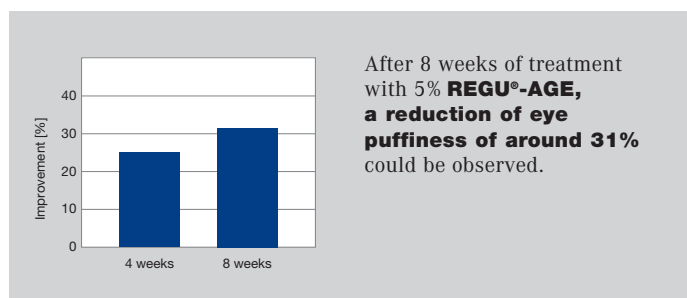

In vivo tests:

Twenty subjects applied the product to their faces twice a day after facial cleansing over a period of 8 weeks. The study was performed on a double blind randomized basis.

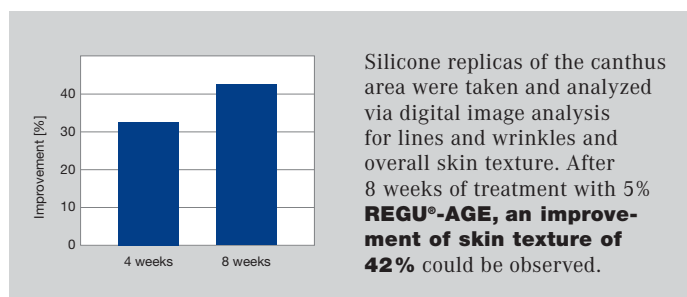

Reduction of dark circles:

Reduction of eye puffiness:

Skin smoothness:
